

COMING SEPTEMBER 1ST –

Academic Labs for Student Assistance

We are excited to announce that beginning September 1st, each department will provide academic labs for student assistance opportunities. These labs allow students to meet with a faculty member in an academic area. Teachers and students are still able to meet outside of this lab approach for more specific support. Visit the STM home page to for the location and schedule for each lab. These labs provide a unique opportunity for our students to receive additional assistance with questions related to classroom curriculum.
